Week One Recap

Last week marked the exciting first week of STEM Camp, where young minds ignited their passion for science, technology, engineering, and mathematics. It was an inspiring week filled with hands-on projects like creating ecosystem habitats, lemon volcanoes, sailboats, windmills, and superhero masks. Additionally, we enjoyed two thrilling field trips to the Extreme Animal Show and KSWO Channel 7 Broadcast Studio. Our scholars, volunteers, and teachers set the bar high, eagerly anticipating the coming weeks.

Week Two at a Glance
